How you stay in the back of my head
All this time always there when it feels dead
You and I we could never grow apart
You're in my mind forever in my heart

Years go by I still love you more
Each day my dreams are comin' true with you

Call it fate I just want to be with you
Call it luck of the draw that you want me too
Forever young we fall for each other
Perfectly strung a masterpiece coming together

Colombo by night you gave me your heart
